Dashboard

- The dashboard showcases the ongoing simulation for a given number of nodes.
- The number of nodes can be specified and when the start button is clicked, the transactions begin. When the number of nodes is not specified, it takes a default value of 10 nodes.
- The transaction count, numbers of blocks and the total amount in the chain can be seen on the dashboard.
- The line chart showcases the number of blocks in the chain for a particular time.
- The bar graph showcases the amount each node has.

This is how the dashboard looks like for 10 nodes:
